<b>AESTHETICS</b>		21. SPREADING & COMPACTING	4		
10. BLOWING LITTER	3	*22. DAILY COVER	5		
11. LIMITED ACCESS	2	23. FINAL COVER	4		

Based on an inspection this day, the items circled above identify the violations in operations or facility which must be corrected by the next routine inspection or such shorter period of time as may be specified in writing by the regulatory authority.

\*Major violations requiring immediate correction and resulting in an unacceptable rating.

**COMMENTS:** Spoke with operator of salvage yard where site is located. Although he would not permit to walk back on the site, he stated the site has been closed since December, 1976. He indicated that he would gladly permit me access but had to leave immediately and was closing the site. I waited down the road and he did leave locking the gate as he left. I waited approximately a half hour and he did not return from the road along the fence. Very little evidence of filling was observed. However, it was difficult to make a decision due to amount of salvage on ground.
